

Dear Harry is there any standard for measuring the spiral flow of polyethylene

Thanks for your question. I spoke with a colleague at ASTM D20 who works with polyethylene. He told me that it is a common test in the industry (and PP as well) but there are a number of different molds and procedures. There is no standardized procedure in ASTM for the test. I'm not sure about ISO. I'll check on that and if I find something, I'll let you know. Thanks again.
